CAREER OBJECTIVE

Full Stack Developer with 3+ years of experience building scalable web and mobile applications using React.js, Flutter, Node.js, and FastAPI. Currently working remotely with an Australian engineering team at Appomate, developing AI-powered learning systems using OpenAI APIs. Experienced in building production systems with Redis workers, Firebase integrations, and cloud deployments using AWS and Docker.

WORK EXPERIENCE

Software Engineer

Appomate — Melbourne, Australia

Dec 2025 - Present

Remote

- Developing scalable backend APIs using FastAPI and Python
- Building responsive web interfaces using React.js
- Developing cross-platform mobile applications using Flutter
- Implementing AI-powered tutor features using OpenAI APIs
- Building systems for AI exam generation and flashcards
- Collaborating with distributed engineering teams using GitHub and Jira

Software Developer

Sourcery IT

Jan 2024 – Dec 2025

Work from office

- Developed scalable web applications using React.js, Next.js, and TypeScript
- Built mobile applications using React Native for Android and iOS
- Integrated APIs and improved application performance
- Implemented role-based access control and approval workflows
- Collaborated with backend teams for API integration and system improvements

SKILLS

- **Frontend:** React.js, Next.js, Flutter, React Native, HTML, CSS, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js, NestJS, FastAPI
- **Programming Languages:** JavaScript, TypeScript, Python
- **Databases :** MySQL, MongoDB, Redis, Firebase,Postgres
- **AI & Modern Technologies :**OpenAI API, AI Tutor Systems, LLM Integrations,Vector Db,RAG
- **Tools & DevOps:** Docker, AWS, Git, GitHub, Jira, CI/CD, PlayStore, Apple Store
- **Background Processing:** BullMQ, Redis Workers,Celery

PROJECTS

TradieLab – AI Tutor Platform

- **Role & Responsibilities:** Full Stack Mobile Engineer –Built the entire backend using FastAPI, including database design and API development.
- Developed an AI Tutor using RAG architecture with LangChain, OpenAI, Embeddings, and ChromaDB.
- Designed and implemented backend database schemas and scalable API services.
- Developed Flutter mobile app screens including Signup, Signin, Exams, and Flashcards.
- Implemented background workers using Celery and Redis for asynchronous tasks.
- Integrated Firebase services for push notifications in the mobile application.

- Built APIs to support exam practice, learning modules, and AI tutor interactions.
- **Tech Stack:** React.js, Material-UI (MUI), Tailwind CSS, Node.js, Express.js, MySQL

Mumbrand Platform

- **Role & Responsibilities:** Full Stack Engineer –Developed scalable REST APIs using NestJS for backend services.
- Built background workers with BullMQ and Redis for asynchronous job processing.
- Implemented job indexing and nearest job matching logic for efficient job discovery.
- Integrated Firebase Push Notifications and Email Notifications for user alerts.
- Implemented Firebase SDK integration in Flutter for authentication and notifications.
- Developed in-app subscriptions using RevenueCat in the Flutter application.
- Designed backend services supporting mobile features and real-time interactions.
- Collaborated with frontend to ensure smooth API integration with Flutter apps.
- Optimized application performance with scalable architecture and background processing.
- **Tech Stack:** Flutter, NestJS, Firebase, BullMQ, Redis, Revenue Cat, Supabase

Document Management System (DMS)

- **Role & Responsibilities:** Full Stack Developer –Designed and managed the database structure for efficient document storage and retrieval.
- Developed REST APIs and handled seamless frontend-backend integration.
- Built a responsive UI using React.js with features like filtering, search, and report downloads.
- Developed a web-based document management platform with approval workflows.
- Implemented document creation using dynamic templates.
- Built hierarchical approval system allowing managers and approvers to review documents.
- Integrated role-based access control and API-based backend services.
- **Tech Stack:** React.js, Node.js, Express.js, MySQL, Material UI

Kanban Inventory App (Lumax Automobiles)

- **Role & Responsibilities:** Full Stack / Mobile Developer - Developed a Kanban-based inventory management mobile application using React Native CLI.
- Implemented barcode/laser scanning and duplicate scan detection for inventory tracking.
- Integrated Bluetooth printing for label and inventory operations.
- Built REST APIs and user interfaces for inventory workflows.
- Implemented authentication and role-based access (Admin & User) for secure system access.
- **Tech Stack:** React.js (Web Portal), React Native (Mobile App), Node.js, Express.js, MySQL

DotPvP – Web3 Multiplayer Game (Agar.io Inspired)

- **Role & Responsibilities:** Developed a Web3 multiplayer game inspired by Agar.io using Next.js.
- Implemented blockchain wallet authentication (MetaMask, Phantom) using Reown Kit.
- Built real-time leaderboard and game stats updates using WebSockets and Redis.
- Integrate Twitter and Telegram integrations for community engagement.
- Implemented referral and reward system to drive user growth.
- Designed and developed game APIs and frontend interfaces for the platform.
- **Tech Stack:** Next.js, Node.js, MongoDB, WebSocket, Redis, Zustand, ReownKit

Trade Pending Mobile Application

- **Role & Responsibilities:** Developed a cross-platform mobile application using React Native and Expo.
- Built core features including product listing, video uploads, and in-app chat functionality.
- Implemented Share Your Autobiography feature to allow users to present vehicle history and details.
- Designed and integrated REST APIs for data management and real-time interactions.
- Implemented user authentication and secure data handling.
- Developed responsive mobile UI components and optimized app performance.
- Collaborated on feature development, debugging, and deployment of mobile application features.
- **Tech Stack:** React Native (Expo), Firebase

EDUCATION

GL Bajaj Institute of Technology and Management
Bachelor of Technology in Mechanical Engineering

Sep 2014 - Aug 2018

ACHIEVEMENTS

- Built and deployed multiple production web and mobile applications.
- Developed AI-powered tutor systems using OpenAI APIs.
- Experience working remotely with international engineering teams.
- Built scalable applications using React, Flutter, FastAPI, and Node.js.
